Methodology

To put together a comprehensive list of the largest philanthropists of China is an almost impossible task. However, we believe that the *Hurun Philanthropy List*, published since 2004, is the most serious and authoritative effort to date, identifying the individuals and highlighting the causes they donate to.

To make this list, the *Hurun Research Institute* surveyed 3000 of China's most successful entrepreneurs, including the 2056 from the recently released *Hurun China Rich List 2016* and the 609 Chinese from the *Hurun Global Rich List 2017*, meticulously cross referencing the results with media reports and charitable foundations. In the course of the research, *Hurun Research Institute* attended non-profit-related seminars, as well as meeting with scholars, experts, philanthropists and senior members of charitable foundations.

Hurun Research includes cash and cash equivalents pledged with legally binding commitments for the twelve month period from 1 April 2016 to 31 March 2017. When comparing previous lists, please note that for corporate donations Hurun Research for the second year running multiplied the donation by an individual's shareholding in the company.

The list includes only individuals born and bred in mainland China regardless of the passport they currently hold. Values are rounded, and past figures are subject to exchange rate fluctuations. 1 USD = 7 RMB.

Thank you for all the organizations and individuals who have supported and helped us in compiling the list.
